MOTOTRAK
motorcycle tracking system

please call **0800 612 9885** for a

Welcome to a new era in Motorcycle Tracking!

SmarTrack have fully developed MotoTrak Maxi, an innovative product that tracks Sports, Naked, Classic, Prestige, Custom, Economy Scooter and Dispatch motorcycles.

MotoTrak Maxi uses the internet and is the pioneer of this new tracking era so you the customer can benefit from peace of mind that your Bike (asset) is closely monitored. Monitoring your motorcycle has never been so easy, you can log on, fix a Geo-fence around it and if it moves you will be email alerted to the fact!

This is ideal for the winter months when it's stored from the salted roads. This system is set up to show 1 minute positions when being ridden, showing location, time, speed and start/stop reports.

Thatcham Approved Monitored subscription you will receive a call if the vehicle is illegally moved, a signal is sent to the SmarTrack Secure Control Centre (SCC) who will in turn call the owner to confirm a possible theft. If the theft is confirmed, SmarTrack can begin to track the vehicle live and liaise with the local Police. SmarTrack staff are BS7858/ISO 9001 police liaisons.

Protect your motorcycle and have MotoTrak Maxi Internet based tracker fitted, and don't forget...MotoTrak can be moved from motorcycle to motorcycle making this the ultimate long term purchase and great value for money.
