Stolen Vehicle Tracking Systems

Cars, Vans and Lorries, Plant, Marine and Agricultural

Trident

Trident is the very latest in internet based Stolen Vehicle Recovery tracker system. You can view your asset online with twice daily (midday and midnight) updates with standard subscription. Extra 1 minute updates available.

The Trident has internal aerials and is covertly and professionally installed on your vehicle and does not require any involvement from the owner. Your vehicle is used as normal. This system incorporates a movement sensor, which detects unauthorised movement of your vehicle. If the vehicle is illegally moved, a signal is sent to the SmarTrack Secure Control Centre (SCC) who will in turn call the owner to confirm a possible theft. If the theft is confirmed, SmarTrack can begin to track the vehicle live and liaise with the local Police. SmarTrack staff are BS7858/ISO 9001 police liaisons. The system is supplied with its own Longlife™ back up battery. If your vehicle battery is disconnected, SmarTrack will call you and ask for confirmation that the vehicle is safe. **TQA104**

Protector+

The Protector+ is covertly and professionally installed on your vehicle and does not require any involvement from the owner. Your vehicle is used as normal. This system incorporates a movement sensor, which detects unauthorised movement of your vehicle. If the vehicle is illegally moved, a signal is sent to the SmarTrack Secure Control Centre who will in turn call the owner to confirm a possible theft. If the theft is confirmed, SmarTrack can begin to track the vehicle live. The system is supplied with its own back up battery. If your vehicle battery is disconnected, SmarTrack will call you and ask for confirmation that the vehicle is safe. **TQA065**

Working with the Police throughout Europe

Alert 24 Keyguard

The Keyguard has the same technical specification as the Trident. The system requires a 4 digit PIN to be entered into the remote control (2 supplied) before moving the vehicle. In the event of non-entry or an incorrect PIN a signal is sent to the SmarTrack Secure Control Centre who will in turn call the owner to confirm a possible theft.

This is ideal for additional protection against key theft and car jacking we advise this system for low use sports, classic cars, caravans and Motorhomes. **TQA102**

Maxi (Plant, Marine and Agricultural)

This system is very small and water resistant making it ideal for Plant and Agricultural equipment. It is possible to view your asset via our Secure Website (12 hour updates as standard included into your subscription). The use of the latest Sirf-Star GPS antenna and Quad band GSM components means the Maxi is capable of operating inside buildings. The Maxi has the very latest in Geo-fence technology, which means you can be alerted via email or mobile phone if your asset is on the move (ideal if you don't want your vehicle to leave a specific area) **TQA103**

Fleet Assist

This system will guarantee cost savings (often over £1 per day on most vehicles) as soon as it is fitted. It is a GPS based device that will enable you to track your vehicles live with 1 minute updates. You also benefit from start and stop reports, reverse Geocoding (address of location) email MPH warning, Geo-Fence (in and out), Road traffic updates and insurance discounts due to the fact this system is also monitored by the SmarTrack SCC. The subscription includes full Stolen Vehicle Recovery.

Blu-ADR

This is the ideal product to protect your car from ever growing key theft burglaries. ADR is Automatic Driver Recognition, this enables the driver to be recognised by our tracking device. This system can be added to all of our Stolen Vehicle devices.

SmarTrack Subscription

Annual £135

Duration of Vehicle Ownership £385

Subscriptions include European cover

Online 1 minute journey updates £50 extra per year

E-call

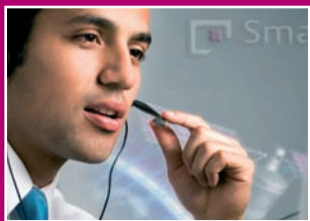

Ecall is a 'no cost' European optional extra, an emergency button is covertly fitted to your vehicle which when pressed will alert our SCC. Approved Staff will then contact you to provide emergency assistance. For further information please visit
